

Satellite symposium at the 48th Annual SIOF Congress

Innovating drug development in the era of targeted and immune therapy

13:00–14:00, Thursday, 20th October 2016
Liffey Hall 2, The Convention Centre
Dublin, Ireland

Please join our experts as they discuss the new era of clinical trial design in paediatric oncology to develop targeted and immune therapy for children with cancer

Lunch boxes will be provided

This symposium is not intended for physicians practising in the USA

Welcome and introduction
Prof. Gilles Vassal, France

Lessons learned from the BERNIE study of bevacizumab in paediatric sarcomas
Dr Michela Casanova, Italy

Lessons learned from the rituximab phase III study for paediatric B-cell malignancies (BO25380/IGR2009)
Dr Véronique Minard-Colin, France

Paediatric cancer immunotherapy landscape: focus on checkpoint inhibitors (PD-1/PD-L1)
Dr Juliet Gray, UK

Roundtable and Q&A
All faculty and audience

NP/ONCO/1608/0027

Date of preparation: Sept 2016
